

To Whom It May Concern:

10th December 2009

Our project was consisting of two residential towers (22 floors each) with a two storey shopping mall and 2 basement car park. This 56,000 m² challenging project was built without a delay, with minimized construction costs, and in good quality conditions.

Mr. Murat AKCAEL and his team always approached the difficulties very proactively, found out extremely innovative solutions for any kind of technical and non-technical challenges.

We would like to underline that Specto Management Solutions is a real client oriented company, highly efficient and competent, capable to handle extreme difficulties under highly tensioned environments.

We would be glad to recommend Specto Management to any company who seeks commitment, professionalism and hands on project and cost management.

Sincerely yours,

Samir Chehab
